POPLITEAL OCCLUSION
BTG CenterCross™ with BTG MicroCross™

Target Lesion
Popliteal, 130mm occlusion

Methodology
The BTG CenterCross™ anchoring catheter was advanced and scaffold deployed just proximal to the cap of the popliteal occlusion.

With the anchoring and centering support of the BTG CenterCross™ the BTG MicroCross™18 microcatheter and Treasure™ 12 guidewire successfully accessed the true lumen.

Crossing Time
Successfully crossed the lesion in 5 minutes.

INDICATIONS:
FDA Clearance:
The CenterCross™ Catheter is intended to be used in conjunction with steerable guidewires to access discrete regions of the coronary and peripheral vasculature. It may be used to facilitate placement and exchange of guidewires and other interventional devices. The CenterCross™ ULTRA Catheter is intended to be used in conjunction with steerable guidewires to access discrete regions of the coronary and peripheral vasculature. It may be used to facilitate placement and exchange of guidewires and other interventional devices. The MultiCross™ Support Catheter is intended to be used in conjunction with steerable guidewires to access discrete regions of the coronary or peripheral vasculature and for guidewire exchange beyond stenotic lesions, including chronic total occlusions (CTOs). The MultiCross™ Support Catheter is also intended for use as a conduit for the exchange/support of guidewires in the peripheral and coronary vasculatures. The MultiCross™ Support Catheter is also intended to infuse and deliver saline and contrast agents.

CE Mark:
The CenterCross™ Catheter is intended to be used in conjunction with steerable guidewires to access discrete regions of the coronary and peripheral vasculature. It may be used to facilitate placement and exchange of guidewires and other interventional devices beyond stenotic lesions, including chronic total occlusions (CTOs). The MultiCross™ Support Catheter is intended to be used in conjunction with steerable guidewires to access discrete regions of the coronary or peripheral vasculature and for guidewire exchange beyond stenotic lesions, including chronic total occlusions (CTOs). The MicroCross™ Catheter is intended for use as a conduit for the exchange/support of guidewires in the peripheral and coronary vasculatures. The MicroCross™ Catheter is also intended to infuse and deliver saline and contrast agents.

Caution:
Federal (U.S.) law restricts this device to sale by or on the order of a physician.
