A COMPLEX LESION CAN HAVE A SIMPLE SOLUTION

The BTG MicroCross™ microcatheter provides the support to make tough occlusion crossings easier in peripheral and coronary vasculature. The advanced technology to stay true lumen facilitates fast occlusion crossings, while the potential to introduce different therapy tools opens revascularization possibilities.

NAVIGATE CHALLENGING PERIPHERAL AND CORONARY ANATOMIES

Serene™ coating is 2–3 times more lubricious

Variable pitch braiding for high performance

BTGVascular.com

SETTING THE STANDARD FOR VASCULAR THERAPIES
Serene™ coating is 2 – 3 times more lubricious than coating on commercial PTCA catheters. Serene Coating PTCA Case Study (SurModics Report 2012 – 23).

Product availability varies by country. Prior to use, please refer to the applicable Instructions for Use (IFU) for complete product indications, contraindications, warnings, and precautions.

Caution: Federal (USA) law restricts these devices to sale by or on the order of a physician.

Combining BTG MicroCross™ with BTG CenterCross™ Provides a Comprehensive Crossing Solution

BTG MicroCross™ Puts You Ahead
- Ultra-low profile and tapered tip track through complex, tortuous, and narrow anatomy to the lesion
- Variable pitch braiding optimizes stiffness at the proximal end and flexibility at the distal end, providing high torqueability without kinking
- Lubricious state-of-the-art Serene™ coating provides low friction force and a Teflon-lined inner core for smooth guidewire control
