Guidance and expert support for optimizing treatment with TheraSphere®

- Medical Liaisons
- Medical Preceptors
- Radiation Safety
- Reimbursement
Humanitarian Device.

TheraSphere® is authorized by Federal Law for use in radiation or as a neoadjuvant to surgery or transplantation in patients with unresectable hepatocellular carcinoma (HCC) who can have placement of appropriately positioned hepatic arterial catheters. The device is also indicated for HCC patients with partial or branch portal vein thrombosis/occlusion, when clinical evaluation warrants the treatment. The effectiveness of this device for this use has not been demonstrated.¹

Common adverse effects include fatigue, pain, and nausea. The majority of adverse effects are mild to moderate in severity and are manageable or resolve over time. For more important safety information, please refer to the TheraSphere® Package Insert at www.therasphere.com.¹³
